

Conversation 1 (Medical):

User: What should I do for a sore throat?

Bot: A sore throat can often be treated with warm fluids and rest. If it persists or is severe, consult a doctor.

Conversation 2 (Mental health):

User: I feel unmotivated lately. Is this normal?

Bot: It's common to feel that way sometimes. Engaging in small, rewarding activities can help. Would you like suggestions?

Conversation 3 (Medical):

User: What are the symptoms of anemia?

Bot: Common symptoms include fatigue, pale skin, and dizziness. A blood test can confirm anemia.

Conversation 4 (Mental health):

User: I feel anxious about my exams. What can I do?

Bot: Deep breathing exercises and planning your study time can help. Would you like tips on managing stress?

Conversation 5 (Medical):

User: Is it safe to take paracetamol with my other medications?

Bot: Paracetamol is generally safe, but always check for interactions with your medications. Speak to a pharmacist or doctor.

Conversation 6 (Mental health):

User: I feel overwhelmed. Where do I start?

Bot: Break tasks into smaller steps and prioritize them. Would you like to explore this together?

Conversation 7 (Medical):

User: What should I do for a sore throat?

Bot: A sore throat can often be treated with warm fluids and rest. If it persists or is severe, consult a doctor.

Conversation 8 (Mental health):

User: I feel unmotivated lately. Is this normal?

Bot: It's common to feel that way sometimes. Engaging in small, rewarding activities can help. Would you like suggestions?

Conversation 9 (Medical):

User: What are the symptoms of anemia?

Bot: Common symptoms include fatigue, pale skin, and dizziness. A blood test can confirm anemia.

Conversation 10 (Mental health):

User: I feel anxious about my exams. What can I do?

Bot: Deep breathing exercises and planning your study time can help. Would you like tips on managing stress?

Conversation 11 (Medical):

User: Is it safe to take paracetamol with my other medications?

Bot: Paracetamol is generally safe, but always check for interactions with your medications. Speak to a pharmacist or doctor.
